**Hello All:**

The below email is from a former employee of CES that now works for an Environmental Company. He has been very helpful. I am sending this to you because he indicated Citgo Caustic and I am not sure we have located anything associated with Citgo. We may want to scour our records to see how they may or may not be involved.

Thanks

Hello Gary:

These results are not surprising for what we know is in the boxes. It is not consistent with that of the Houston facility that only processed non-haz and oily water. It my understanding that these boxes came from the Port Arthur plant as either Citgo's caustic or waste derived from the processing of the Citgo waste.

Thank You,  
Gary Brauckman

**Mickey/Gary:**

**Veolia got samples of each of the vac boxes and we are going to get hit significant surcharges for sulfur and sodium. These are their comments. Is this surprizing to you based upon the operation of the facility?**
